Acceptance criteria:	5

User story 1:

As a family-member, I need to be able to add items to a shopping list so that I can keep track of the items that has to be purchased.

Wireframe:

Name	Description	Author	Bought
Milk	1 gallon of milk	Test User	<input type="checkbox"/>
Apples	A dozen of green apples	Test User	<input type="checkbox"/>

Acceptance criteria:

I need to be able to add the items name, description, store where it should be bought from and the importance/urgency.

Items without a name can't be inputted.

An item can be added even if the shop or/and description is empty.

User story 2:

As a family-member I need to be able to delete the items that have been bought on the go so that I can keep track of which items I still need to buy.

Wireframe:

Name	Description	Author	Bought
Milk	1 gallon of milk	Test User	<input type="checkbox"/>
Apples	A dozen of green apples	Test User	<input type="checkbox"/>

Acceptance criteria:

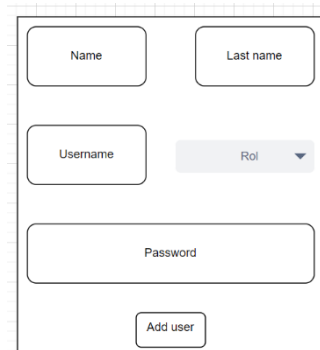

When an item is bought it should disappear from the list.

When all the items of a list have been bought the list should disappear.

User story 3:

As a family-admin I'm able to add family-members or viewers to the family-group so that I can give access to the right people to the right features.

Wireframe:

A wireframe for a form to add a user. It consists of a central container with a grid background. Inside, there are four input fields: 'Name' and 'Last name' at the top, 'Username' and a 'Rol' dropdown menu below them, and a larger 'Password' field. At the bottom of the container is an 'Add user' button.

Acceptance criteria:

Empty fields are not allowed.

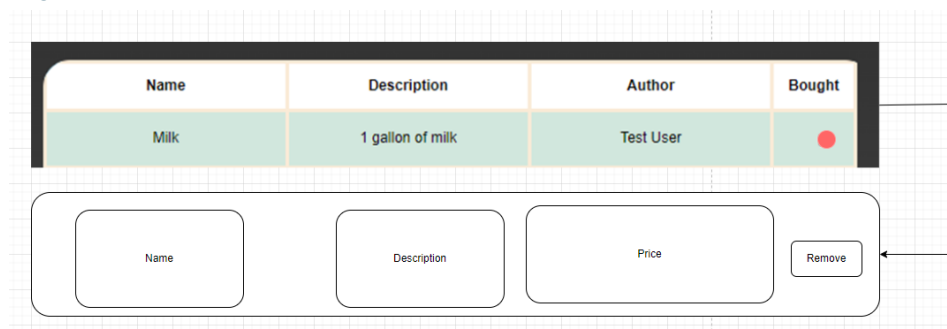

A Password should be strong (8 characters long, contains capital letters and symbols)

When the add user button is pressed a user is added to the database.

User story 4:

As a family-member I want to be able to optionally input the price of an item when buying it so that I can keep track of my monthly spendings and which items I bought throughout the month.

Wireframe:

A wireframe for an item tracking interface. It features a table with four columns: 'Name', 'Description', 'Author', and 'Bought'. The first row contains the data: 'Milk', '1 gallon of milk', 'Test User', and a red dot. Below the table is a form with four fields: 'Name', 'Description', 'Price', and a 'Remove' button. A line connects the 'Remove' button to the 'Bought' column of the table.

Acceptance criteria:

When the bought button is pressed the Author field is replaced by price and the option to remove the item without adding a price appears as well.

When pressing the enter key while inputting the price the price is inputted, and the item is removed from the list.

No negative prices can be inputted.

The “.”, “,” marks are the same as a regular decimal separator.

Only numbers can be inputted in the price field.

User story 5:

As a family-member I want to be able to see my profile and modify my personal information so that I can make sure the info about me is right.

Wireframe:

The wireframe illustrates a two-step process for modifying a user's profile. The top screen, titled 'Profile', features a header with a 'Me' button and a profile icon. Below this, there are input fields for 'Name', 'Surname', and 'Email'. Further down are fields for 'New Password' and 'Confirm new Password', followed by a 'Save changes' button. A vertical arrow indicates a transition to the bottom screen. The bottom screen, also titled 'Profile', shows the same header and input fields. A green box labeled 'Confirm changes' is overlaid on the screen, containing a 'Current Password' field and a 'Save changes' button. A second 'Save changes' button is located at the bottom of the screen.

Acceptance criteria:

Pressing the profile button redirects the user to the profile page.

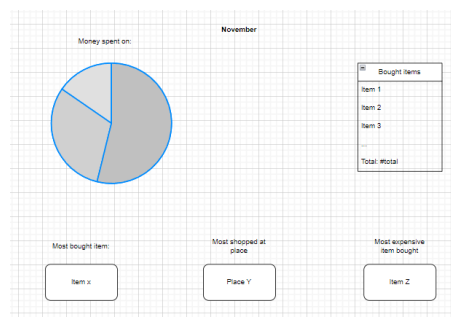

Changing the personal information requires confirmation by entering the current password.

The new password must also be a strong password (8 characters long, contains capital letters and symbols).

User story 6:

As a family-member I want to see my monthly spending and some nice statistics. So that I can know how much I've spent on stuff this month and be able to budget.

Wireframe:

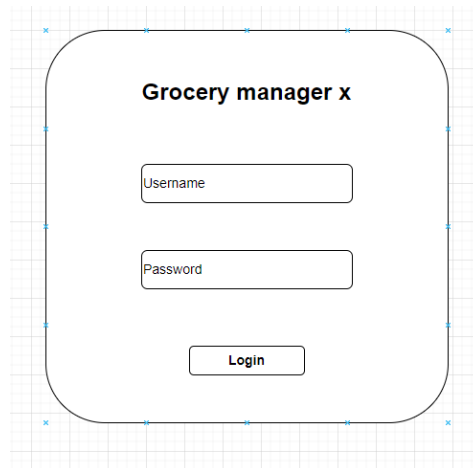

Acceptance criteria:

In the monthly spendings page many useful statistics are displayed like how much money was spent on which item, most bought item, most expensive item, etc

User story 7:

As a family-member I want to have a login menu so that I can login to the website and only I can login with my password.

Wireframe:

The wireframe shows a login form titled "Grocery manager x". It contains three input fields: "Username", "Password", and a "Login" button. The form is set against a light gray grid background. The "Username" and "Password" fields are rectangular with rounded corners, and the "Login" button is a smaller rectangular button with rounded corners.

Acceptance criteria:

Once the user is logged in, they stay logged in for the rest of the session.

If the user enters the wrong username or password a clear error message is displayed.

If the user enters the password or username wrong multiple times a quick link to contact the admin appears.
